

Phase	Objective	Tasks	Deliverables	Time
Initial Planning	Define goals, requirements, and system architecture	- Conduct requirement gathering	Requirements document	Weeks 1–2
		- Create feature priority list	System design blueprint	
		- Design system architecture		
		- Develop user workflows		
Increment 1	Build user authentication system	- Develop user registration form	Functional registration and login module	Weeks 3–4
		- Implement login functionality with password encryption		

		- Enable role-based access for clients and lawyers		
Increment 2	Develop legal document templates module	- Create module for storing templates	Document upload/download module	Weeks 5–7
		- Design user-friendly interface for downloads		
		- Test upload/download functionality		
		- Build search and filter functionality for profiles		

Increment 3	Build pro bono and NGO support module	- Enable profile creation for lawyers and NGOs	Functional lawyer/ NGO search module	Weeks 8–10
		- Test and refine search capabilities		
Increment 4	Create secure case tracking module	- Create secure file upload system	Case tracking module with secure access	Weeks 11–13
		- Implement role-based access for documents		
		- Develop case status dashboard		
	Add video	- Integrate third-party API (e.g., Twilio, Agora)	Video	

Increment 5	video and voice consultation functionality	- Implement scheduling and notification system	and voice consultation functionality	Weeks 14–16
		- Test consultation features		
Integration and Testing	Combine all features and test usability	- Integrate all modules	Fully integrated and tested system	Weeks 17–19
		- Conduct usability and performance testing		
		- Refine based on feedback		
Deployment and Documentation	Finalize the project for presentation	- Deploy the platform	Deployed platform	Weeks 20–24
		- Write project documentation and user manual	Documentation and user guide	

		- Prepare present ation material s
